- \* This is the recommended minimum amount of hay to be fed. If feeding more hay, reduce the feeding rate of Purina® Miniature Horse and Pony horse feed by 0.5 lb for every 1.0 lbs of additional hay fed. EXAMPLE: Using the chart above, if feeding 7 lbs instead of 6 lbs of hay to a 500 lb light working pony, reduce Purina® Miniature Horse and Pony horse feed offered by 0.5 lb from 3.3 to 2.8 lbs per day.
- \*\* Do not feed less than 0.3 lbs per 100 lbs of body weight per day for mature horses (0.9 lbs for a 300-lb horse), 0.50 lbs per 100 lbs for lactating mares (1.5 lbs per 300 lb-horse) or 0.75 lbs per 100 lbs of body weight per day for weaned foals and yearlings (2.25 lbs per 300-lb horse). If your horse gains too much weight at that minimum feeding rate, transition to Purina® Enrich Plus® Ration Balancing horse feed.

0.4 lbs of Miniature Horse and Pony horse feed per 100 lbs of body weight supplies a full serving of Outlast® Supplement
